WORK EXPERIENCE

Flutter Developer, Synchro Ltd — **May 2024 - Present**

- Led end-to-end development of Psyatlas, a production client–practitioner platform, owning core features from architecture to release.
- Delivered 8+ production modules, including authentication, practitioner discovery, booking/approval, payments, chat, notifications, and localization, covering the main user journey from onboarding to completed sessions.
- Established a scalable MVVM structure with Provider/ChangeNotifier, reusable widgets, service layers, and routing, improving maintainability across 7+ core modules.
- Integrated 4+ Firebase services, Stripe, and REST-based backend services to support secure authentication, real-time data sync, payments, push notifications, and backend-driven workflows.
- Improved session data performance by introducing real-time listeners, ViewModel-level caching, and pagination, eliminating repeated fetches on screen reopen and reducing initial data load by up to 80%.
- Standardized async state handling, loading/error states, validation, and routing across 7+ core modules, improving reliability and reducing inconsistent user flows.
- Supported Android/iOS release readiness by testing production-critical flows, resolving platform-specific build/runtime issues, and reducing release-blocking defects before deployment.
- Collaborated with backend/product stakeholders to define requirements, handle edge cases, and deliver production-ready mobile features.

Freelance Flutter Developer — **Jan 2025 - Present**

- Delivered a production-oriented loyalty application integrated with custom backend services.
- Built QR-based bonus collection/redemption, multilingual UI, user profiles, admin transaction management, analytics/statistics, and Excel export features.
- Designed reusable UI components and service-based API flows to support maintainability, scalability, and future feature expansion.

Flutter Developer, ByBike — **Oct 2022 - Feb 2024**

- Contributed to a Flutter-based micromobility app for e-scooter and e-bike rentals.
- Used BLoC to manage screen states, user interactions, loading flows, and API-driven data updates.
- Integrated REST API data with JSON parsing, error handling, and dynamic UI rendering.
- Converted Figma designs into responsive Flutter screens using reusable widgets and clean UI structure.

Flutter Developer Intern, Technofusion LLC — **July 2023 - Aug 2023**

- Implemented UI screens and reusable widgets from design specifications.
- Integrated REST APIs, handled state updates, and fixed bugs across Flutter screens.

Flutter Developer Intern, Safaroff Agency — **July 2022 - Aug 2022**

- Developed Flutter screens from design requirements and improved mobile UI implementation skills.
- Assisted with debugging, Git collaboration, and writing cleaner Dart code in a production-oriented workflow.

EDUCATION

Master's degree in Computer Engineering — **Sep 2024 - Present**
Istanbul Medipol University, GPA 3.62

Bachelor's degree in Computer Engineering — **Oct 2020 - Jun 2024**
Istanbul Medipol University, GPA 3.47

TECHNICAL SKILLS

- **Architecture & State Management:** MVVM, Clean Architecture, SOLID, Provider, ChangeNotifier, BLoC, Riverpod, GetX, Dependency Injection
- **Backend & APIs:** REST API, JSON, Dio/HTTP, Firebase Auth, Cloud Firestore, FCM, Cloud Functions, custom backend services
- **Mobile Features:** Authentication, real-time chat, push notifications, session booking, payments, QR flows, admin tools, localization/i18n
- **Quality & Delivery:** Git, debugging, performance optimization, code review, CI/CD fundamentals, unit/widget/integration testing
- **Languages:** Dart, C++, C, Java, Python; English, Azerbaijani, Russian, Turkish
